

Medication History from DHIN

Quick Reference Guide

Ambulatory Meds Tab

Ambulatory medication history information is available via the **Meds** tab of the Patient Chart. This shows a listing of medications the patient has filled through local and national pharmacies in the past 12 months.

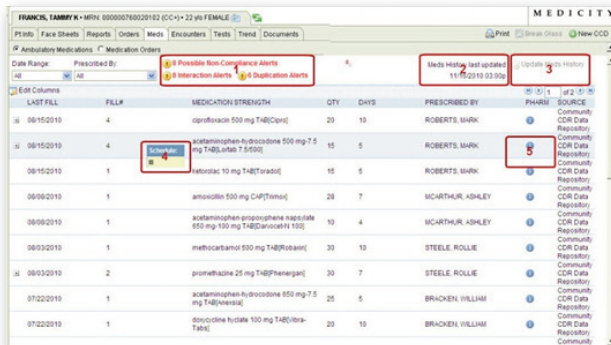

Note: This feature is only available through a partnership with a record aggregation company with whom your organization contracts directly.

Accessing the Meds Tab

1. Log into ProAccess.
2. Search for a patient and display their chart.
3. Click on the **Meds** tab.

Viewing Medication History

Detailed information about medication history information for a patient displays on the **Meds** tab.

LAST FILL	FILL #	MEDICATION STRENGTH	QTY	DAYS	PRESCRIBED BY
08/15/2010	4	ciprofloxacin 500 mg TAB(Cipr)	20	10	ROBERTS, SHARK
08/15/2010	4	ketorolac hydrochloride 500 mg-7.5 mg TAB(Lunex 7.5/500)	15	5	ROBERTS, SHARK
08/15/2010	1	ketorolac 10 mg TAB(Tradol)	15	5	ROBERTS, SHARK
08/08/2010	1	amoxicillin 500 mg CAP(Tamox)	28	7	MCARTHUR, ADHLEY
08/08/2010	1	ketorolac hydrochloride 500 mg-7.5 mg TAB(Lunex 7.5/500)	10	4	MCARTHUR, ADHLEY

To Display Details for Medication Alerts

The header of the **Meds** tab displays the following potential medication alerts for the patient (see **Figure 1, #1**):

- Compliance
- Duplication
- Interaction
- Allergies

Note: The system lists potential alerts, based on the information available. They are limited to the information available and may be based on up to a year of patient medical history.

1. Click the alert type in the header to view the details.
2. Click **Close**, when finished.

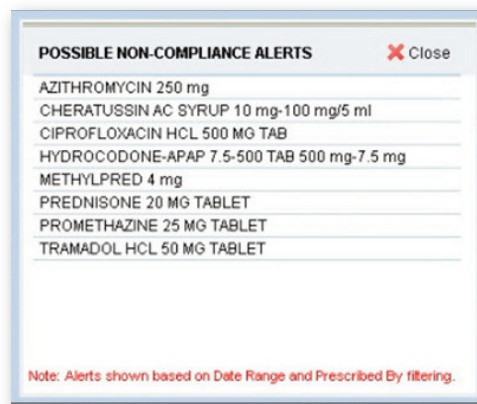

Figure 2

To View the Last Updated Date/Time

The last date and time the meds history for a patient was updated displays in the top right-corner of the **Meds** tab (see **Figure 1, #2**).

To Update Medication History Information

If an updated medication list is needed, click the **Update Medication History** icon in the top right-corner to initiate a real-time medication history query (see **Figure 1, #3**). This query may take up to 60 seconds to complete.

Note: If the auto-initiate Medication History Nexus module is used, an updated medication list will automatically be generated when specific HL7 message types are received for a patient (A01, A04, et al.). This module can be implemented for use with ProAccess 5.3 or newer versions.

When the results from the medication history query are returned, the new medications display and the last updated date/time on the **Meds** tab will refresh to the current date/time. The new medications are then stored and are now available for other users to view for this patient. If no medications are found for the patient, then a “no medications found” message will display under the updated date/time.

Heading	Description
Last fill	The last date the prescription was filled for this medication.
Fill #	The number of times that the pharmacy has dispensed this medication. Click the expand icon (+), if present, to show previous fills.
Medication strength	Amount of medication per tab, capsule or other means of dispensing.
Form	The physical form of the product as presented to the patient. For example: tablet, capsule, liquid, or ointment.
Dose	The dose of the medication.
Qty	The actual quantity of product supplied.
Days	The amount of product indicated by the ordering provider to be supplied.
Prescribed by	The person who wrote the prescription.
Pharm	Pharmacy that filled prescription.
Source	Source of prescription data.

Figure 3

Once a medication history query has been initiated, the **Update Meds History** icon will become inactive for this patient for a defined period of time (system default is 24 hours). Initiating a new medication history query for this patient will not be possible during this inactive time period.

To View Controlled Substance Warnings

Controlled medications will display in red text. To see which DEA Schedule the medication belongs too, hover over the medication name. A warning box will display that shows the DEA Schedule for the medication (see **Figure 1, #4**).

acetaminophen-hydrocodone 650 mg-7.5 mg TAB [Anex]	Controlled Substance:	25
doxycycline Tabs]	DEA: Schedule III	20

Figure 4

To Display Dispensing Pharmacy Information

Hover over the **Information** icon. (see **Figure 1, #5**). The name, address, and phone number of the pharmacy that filled the medication will display (if available).

To Filter or Sort Records

You can filter the medication records through the drop-down menus according to:

- Date Range
- Prescribed By

To sort records, click the column name. If an arrow appears next to the column name, the records are sorted in ascending (↕) or descending (⇩) order.

Printing Medication History

You can print a medication history report by selecting the **Print** icon located in the top-right corner of the Meds tab.

1. In the Meds tab, display the patient medication history that you want to print.
2. Click the **Print** icon located in the top-right corner.
3. Specify what you want to print from the drop-down list:
 - Print All
 - Print Last and First Fill
 - Print Controlled Only
4. Check **Include Alerts**, if desired.
5. Specify the printer and printer options and click **OK**.
