New Year, New Goals

DHIN’s Corporate Goals for FY18

Summer’s come to a close, school’s back in session, and Delaware Health Information Network (DHIN) has turned the page to Fiscal Year 18. The end of 2, two-year, $3.3 million grants from the Office of the National Coordinator for Health IT, Department of Health & Human Services marks an important transition for DHIN, as the team will shift its focus from innovation to more traditional “run the business” activities, with an emphasis on a technology refresh and expansion of products and services.

Highlights from DHIN’s Healthcare Leadership Summit can be found here.

Required Practice Paperwork for Patient Directives

Delaware recently passed the Delaware Medical Orders for Scope of Treatment Act, which will codify the legal requirements of end of life directives in to a medical order. DHIN will play an integral role in standing up an online registry for these orders, allowing a patient’s end of life wishes to be made more accessible to members of a care team.

To facilitate the sharing of patient directive information, a Business Associate Agreement is required for any organization to submit information in to the community health record or any system being accessed by other organizations. DHIN will be working closely with all of its current practices to get a Business Associate Agreement executed.

We appreciate your help and support for enabling this very important service. Your DHIN business relationship manager will be in touch with you shortly if your practice has not already executed a BAA with DHIN. If you have any questions, please feel free to reach out to your relationship manager directly.

FY18 GOALS

Reduce total annualized FY17 technology costs by at least 5% beginning in FY19 through FY18 contracting activities.

DHIN continues to look for ways to streamline technology spending and evaluating its contracts is one area of focus in the coming year.

Secure new revenue-generating contract(s) with an annualized value of at least $175,000.

DHIN looks to diversify its product suite and business model.

Develop a business pro forma to inform a Board of Directors go/no-go decision regarding the implementation of the healthcare claims database.

The Delaware General Assembly passed legislation in FY16 authorizing DHIN to develop a healthcare claims database. DHIN’s Board of Directors will decide whether it’s financially and operationally feasible to do so.

Execute Year 2 of the Strategic Plan

- Implement ITIL/ITSM Framework tools and processes specific to the Strategy, Design and Continuous Service Improvement stages of the ITSM life cycle
- Perform competitive market analysis
- Execute technology refresh plan

The DHIN team is sorry to lose one of its shining stars, Director of Provider Relations Lakeisha Moore, who has relocated with her family to North Carolina. While we will miss her, our loss is her local health information exchange’s gain, as Lakeisha will be putting her expertise to connect rural health organizations with the state’s health information exchanges.

Stepping into the director role is Jamie Rocke, previously DHIN’s senior manager of provider relations and business development. In her new position, Jamie will lead DHIN’s team of provider relations managers and support business relationship efforts with providers, payers and data senders.

Congratulations, Jamie, on your promotion, and thank you, Lakeisha, for your dedication to DHIN and Delaware’s healthcare providers!

Notable Achievements

Congratulations to DHIN Project Managers TerriLynn Palmer and Catherine Paulish, who passed their Project Management Professional (PMP®) exams earlier this summer. In just three years, all members of DHIN’s project management team have received PMP® certification, recognizing their knowledge of and commitment to the global language of project management.
