Explanation of Budget Categories

- ❖ Data Sender Bundle Revenue represents electronic delivery of clinical results as well as 7 other services for DHIN's 31 data contributors.
- ❖ Payer Bundle Revenue represents funding from the various payers for access to the Community Health Record, Event Notification Services, and a Clinical Information Gateway feed - each of which allows for enhanced care management.
- ❖ CHR - Viewing by Providers allows provider access to DHIN Community Health Record.
- ❖ Encounter Notification Services comprises of revenue derived from Practices as well as Payers/ACO's who do not subscribe to the Payer Bundle.
- ❖ Claims Database - Earned Revenue is for revenue received from paying customers and does not include IAPD or State Appropriation Revenue.
- ❖ Medicaid FFP (HCCD) and the State Appropriation for HCCD line items provide a continuation of funding support for the HCCD from a CMS IAPD funding source in partnership with DMMA which provides a combination of 90%/10% funding through September 2022.
- ❖ Personnel expenditures are for DHIN people-related expenses. DHIN headcount will grow by 1 due with the hiring of a Network Operations team member to meet an aggressive work plan.
- ❖ Administration expenses are for non-people related overhead expenses (lease, ITIL training, computer support, supplies, etc.).
- ❖ Contractual expenses include HCCD project management and analytics expenses as well as contracted work to meet an aggressive work plan.
- ❖ Marketing expenditures are for new product promotion, ongoing website and social media marketing development, and consumer marketing campaigns.
- ❖ Ongoing License and Maintenance expenses are related to existing DHIN functionality, including the HCCD.
- ❖ New Functions expenses are for expansion of DHIN's connectivity to a national exchange network and development costs for a Consent Registry which will meet ONC Consent Management requirements for Mental Health and Substance Abuse data.

Year To Date Key Variance Explanations

- ❖ Professional Service Revenue is higher than planned due to accelerated timing of revenue in support of the COVID-19 contact tracing project. This was originally planned to be recognized in 3Q FY2021.
- ❖ State Medicaid FFP (HCCD) and State Appropriation for HCCD revenue are below plan due to lower than anticipated vendor HCCD analytics expenses, driven by greater capacity amongst DHIN staff.
- ❖ Administration expenses are lower than planned due to a delay in conducting DHIN people education and lower than expected travel and meal expenses.
- ❖ Contractual expenses are lower than planned due to lower HCCD analytic support from DHIN's principal project management contractor.
